Spark VM Split Files

- The Spark VM file is too big and due to some connection problem or network issue, sometimes we are not able to download it completely
- So we have divided this file into several smaller files. (14 Files)
- Just download these files one by one and then start the application. ie - [hjsplit](#)
Uncompress the hjsplit file and run the hjsplit application
- Click on Join, give it location of first file and Output file and it will merge all the files and create one single file. Now this single which got created you need to open it in Virtual Box

Download HJsplrit :

https://edureka.wistia.com/medias/oyhqec47xh/download?media_file_id=83841380

Please download all the splits files from the below links
